As astronomically fixed, Dynasty XII began at	1963.5	2036
Eusebius, for Duration of Dynasty XII	182...	years
End of Dynasty XII, as above	2145.5	1854

*see Annotations A, B, C, D*

In the Appendix II, the short system from Africanus gives as follows:

Ammenemes (Amenemhat I) begins at	1962	2037.5
Africanus, for Ammenemes	16	years
	1978	2022
Africanus for remaining years	160	years for Dynasty XII.
"Vague Year" Epoch of last Hyksos king	2138	1862
Phoenix Cycle at 2138.5 A.K.

19 cycles of 103 years =	1957	2043
Turin Papyrus, for Dynasty XII <sup>2</sup>	213	years
Beginning of XVIIIth Dynasty	2170	1830
	A.K.	B.C.

<sup>1</sup>The .A.K. datings are not guaranteed within .5 year. Thus, the 7th year Senusert III, according to the Table, is 2082.50-2083.5 A.K., whereas the Sirius dating (¶317) shows that the regnal year extended to 2083.5 A.K. (1916 B.C.)

<sup>2</sup>The List of the Turin Papyrus was compiled during late XVIIIth Dynasty, or early XIXth Dynasty. Its data as above, by giving Dynasty XII terminating at the fixed astronomical date of Dynasty XVIII beginning confirm the early XIXth Dynasty Lists of Abydos and Sakkarah, which both place the kings of Dynasty XVIII following in succession after the kings of Dynasty XII.
